

Our purpose and objectives

This NGO aims to study, monitor and conserve all aspects relating to biodiversity

• initiating and implementing environmental projects

• active involvement in protected area management;

• promoting local cultural values and traditions;

• organising bio-ethno-cultural camps;

• participating in conferences, contests and other events on biodiversity issues;

Your attitude matters!

By filling out the attached form you could become a member of our NGO and could participate in our activities. Currently the NGO's membership includes Romanian as well as foreign citizens but mainly local people from communities adjacent to the Rodna Mountains NP. The membership application form can also be obtained from the park's headquarters and website:

www.parcrodna.ro We're waiting for you!

Objectives:

• working together with scientists to conduct biodiversity surveys;

• involving students in monitoring biodiversity in the Rodna Mountains NP;

• promoting local biodiversity values;
• promoting sustainable development;

• raising awareness on environmental legislation;
• attracting and training people interested in biodiversity conservation;

• publishing brochures/scientific documents on topics relating to biodiversity;

Get involved!
